

Thirsty Thursday: Straws

We've all heard the phrase "**skip the straw**". Plastic straws are in the top 10 items found on beach cleanups, and are so lightweight that they easily find their way into the ocean. Today consider "drinking like a fish" with your cold beverages, and skip the straw altogether! Or, if you can't live without your straw, consider investing in a reusable metal, wood, or glass straw.

Fun Fact: Plastic straws have been banned in Provincetown, where CCS is headquartered, since 2018! Which local businesses in your area have ditched plastic straws?
