

## Cleaning: Plastic-Free Style

Sick of buying cleaning products in plastic bottles? **Try making your own with natural cleaners and disinfectants like alcohol, castile, or vinegar.** Or try out **cleaning tablets** offered by some companies like [Blueland](#) (NY) that combine with water to make hand soap, dish soap and other cleaning products. Rather than a petroleum-based dish sponge, use a dish brush or sponge made of natural materials such as bamboo, cellulose or hemp.

Coming up: A virtual screening of 'The Story of Plastic' hosted by the Center for Coastal Studies and Sustainable Practices premieres tomorrow! Learn more at [Story of Plastic VIRTUAL SCREENING EVENT \(FREE\)](#)
